ICOLD ON THE FRONT LINE FOR DEVELOPMENT

Achieving the 2015 millennium goals is the greatest challenge the world has ever faced. The Millennium Development Goals (MDGs) will be achieved by 2015. Effective international cooperation that gives attention to being smart in helping water and food security, has shown that we can do it. The world is rich in water, and there are opportunities to build a sustainable world where all have access to water. The world is rich in water, and there are opportunities to build a sustainable world where all have access to water.

The case of Africa is well known. Twenty years ago the population in sub-Saharan Africa was 400 million. Today it is 800 million. The population growth is exponential. This is a challenge to the world. The world is rich in water, and there are opportunities to build a sustainable world where all have access to water.

Lata Rajya
President, ICOLD

Water is the world's most precious resource. It is essential for life, and it is essential for the development of the world. Water is essential for life, and it is essential for the development of the world. Water is essential for life, and it is essential for the development of the world.

Michael De Vivo
Secretary General, ICOLD
