

## Database Presentation

The screenshot displays the 'Data Search' interface of the CIGB ICOLD database. The search filters are set to: Continent: Africa, Country: Algeria, Dam Type: CB buttress, Height (m): 35, Reservoir Capacity (10<sup>6</sup> m<sup>3</sup>): 41 000, Altitude (m): 41 000, International: [empty], Name of the dam: [empty], and Other Name: [empty]. The results show 154 entries, with the first six rows of the table visible below.

**The World Register of Dams is a database including more than 55 000 dams.**

The Committee of the Register coordinates the data collection within the National Committees. They are included in the database, after validation by the Committee of the Register.

On the website, the database is served by a powerful search engine, which is described in [this document](#).
